

TORNADO WARNING PRECAUTIONS

If a warning is issued on the radio, television, weather monitor or through an activated siren and Everbridge—students, staff, faculty and visitors should:

- Seek shelter immediately.
- Stay away from large, open rooms (i.e., auditoriums and gymnasiums) and other locations with large windows.
- Lie low with hands covering the back of the head to reduce neck injury.
- Remember, a basement is generally the safest place to go; however, if there is no basement, seek an interior room on a lower floor of a reinforced building.
- If outside, lie in a ditch or low area immediately, covering neck and head. Proceed to nearest building only if/when time allows.
- Stay out of parked cars.
